

TASK 04

PRODUCT REQUIREMENT DOCUMENT (PRD)

Feature Name

Parking Spot Reservation

Product

Smart Parking Finder

Purpose of the Feature

Users often find an available parking space on the app but lose it before reaching the location. The Parking Spot Reservation feature allows users to reserve a parking space for a limited time before arrival.

Benefits

- Reduces uncertainty
- Saves time
- Improves user experience
- Increases user trust

User Stories

User Story 1

As a driver, I want to reserve a parking space before reaching the destination, so that I am guaranteed a parking spot.

User Story 2

As a driver, I want to see how long my reservation remains active, so that I know when to arrive.

User Story 3

As a driver, I want to cancel my reservation, so that another user can use the parking space.

Functional Requirements

- FR-1 : User can view available parking spaces.
- FR-2 : User can reserve a parking space.
- FR-3 : System displays reservation timer.
- FR-4 : User receives reservation confirmation.
- FR-5 : User can cancel reservation.
- FR-6 : System automatically releases expired reservations.

Success Metrics (KPIs)

- KPI 1 : 30% of users use the reservation feature.
- KPI 2 : Reduce parking search time by 50%.
- KPI 3 : Increase user retention by 15%.
- KPI 4 : Achieve 90% reservation completion rate.
